Sasha, thx for the language- I expect Roger (who is drafting our paper prior to my review) will only use the Superfund site blurb (as it relates, but should not be confused with the SF site).

Rick- unless you indicate otherwise, will move forward knowing that ECAD is not involved in the Paden City issue, correct-?

Updated language in blue...
Thx!

See below language from SEMD (in blue)...

Also, SEMD is going to meet next Monday (only time available) to discuss if they can answer questions about showering, washing dishes, laundry.

Roger, per our discussion about what to cover- I jotted down some notes as you spoke. I don't expect this needs to be longer than several paragraphs (bulleted actions if many actions to list).

Sasha- please note in yellow highlight one line of context to distinguish ECAD and SEMD's work on this.

Subject:
Vienna Water Filtration System- PFOA/PFAS

Ex. 5 Deliberative Process (DP)

Vienna, WV

SEMD has an NPL Site in Vienna WV. The PFAS/GenX contamination in drinking water in the area of Vienna is due to the Washington Works Chemours Plant located directly across the Ohio River, not the Vienna NPL site, which is a dual dry cleaner site. The Vienna PCE Site is located in the heart of Vienna, and these residents are drinking public water, not bottled water. There is an ordinance prohibiting the drilling of new private drinking water wells in Vienna. Water Division and ECAD have been addressing contamination associated with the Washington Works with a SDWA Order.

Paden City, WV

At the request of WV, SEMD Site Assessment and Removal have been involved with this site. A removal Site Evaluation was conducted in 2019. Based on high levels of volatiles in groundwater and drinking water wells, West Virginia has requested (see attached letter from Jason McDougal) that EPA perform a Site Inspection which is planned for calendar year 2020.

Background:

Contamination characterization related to the site.

Health advisory issued by EPA in January XXXX.

Once health advisory issued, Chemours took immediate action, installing XYZ filtration system.

Permanent treatment installed.
